Letter of Recommendation for

Cassie Wischhoefer

April 5, 2023

To Whom It May Concern,

It is my pleasure to recommend Cassie Wischhoefer for a Software Engineering position within your organization. I work as an IT Systems Administrator at George Fox University and I was Cassie's manager while she was a Student Worker for the IT department. As a Computer Science major, Cassie was able to handle several advanced projects for our team.

In order to standardize and improve efficiency for our Support team, Cassie was given assignments to create, test and implement numerous scripts to facilitate computer provisioning and deployment. The tools she created were well researched, thought out, documented, and have been integrated into our processes.

Cassie also played a key role in the implementation of drive encryption here at George Fox University. She helped define the test cases as well as perform the testing and the analysis of the results. Cassie was also involved in the deployment of drive encryption to the Windows end points.

Cassie is diligent and eager to take on any challenge. She is able to work well independently or as part of a team. She will definitely be a tremendous asset to your organization.

Thank you,

Jim Russell
IT Systems Administrator
